

Sustainable architecture

Made by: Isabella Villano, Andrea Bernardi, Mattia Viotto, Giulia Cela, Naut Kaptijn and Eline Keuning

Table of contents

- Introduction
- What is sustainable architecture?
- Building materials and technologies
- Examples of sustainable architecture in Italy and the Netherlands
- Advantages and disadvantages
- Expectations
- Promotion

Sustainable architecture

- Minimize the harmful effects
- More efficient

Sustainable building materials and technologies

- Sustainable energy and sustainable materials
- Windows
- Solar panels
- Wood and bamboo
- Recycled materials
- Cooling and heating systems

Italian buildings

Palazzo Valperga Galleani in Turin.

- 36 apartments
- The number 6 with a particular courtyard with computer-controlled lightning and automatic watering
- Flower vases holding climbing plants

Italian buildings

Bosco Verticale towers in Milan

- From the idea of Stefano Boeri
- The plants produces humidity and oxygen, absorb CO₂ and act as protection against acoustic pollution
- One hectare of forest
- Two towers, 80 and 112 meters high

Buildings in the Netherlands

Nike European Headquarters in Hilversum

- Built in the middle of an horse-trotting track
- 35.000 m²
- A theme garden for each of the four buildings
- Collecting rainwater (savings 4 mln liters/year)
- Windows made of recycled aluminium
- Sports floors made of bamboo and recycled training shoes

Nike European Headquarters | Hilversum, The Netherlands | William McDonough + Partners

Buildings in the Netherlands

Martini hospital

- 58.000 mq new building; 35.000 mq renovation
- Energy performance reached by isolation
- 30% more daylight than usually
- Noises are isolated by a double-layer façade

Advantages of green building

- EFFICIENT TECHNOLOGIES
- EASIER MAINTENANCE
- IMPROVED INDOOR AIR QUALITY
- RETURN ON INVESTMENT
- ENERGY EFFICIENCY
- TAX INCENTIVES

Disadvantages of green building

- COST
- AIR COOLING FEATURES
- STRUCTURAL ORIENTATION
- GREEN ROOFS
- LABOR LAWS

Expectations of residents

MARINA WELLNESS RESORT

- It is situated along the adriatic coast right in the heart of Caorle Venice
- Marina Verde Wellness Resort is made up of two structures rising from the ground and facing the south which are completely surrounded by and integrated within green areas.

Conclusion

- So what is the solution to not let the beautiful boy with the curly, blond hair and blue eyes die?
- **SUSTAINABLE ARCHITECTURE!!!**
